Professional Experience

CoinDCX **Bangalore, India**
Software Development Engineer 2 (SDE 2) *Oct 2024 – Present*

- **Payment Rail Routing & Resilience:** Architected a multi-bank routing engine (IMPS, NEFT, RTGS) to optimize throughput and enforce blast radius containment. Cut withdrawal failure rates by **51% (1.59% to 0.78%)** via automated fluctuation routing.
- **High-Throughput Ledger:** Scaled a Ruby on Rails Monolith to Go microservices for **INR withdrawals**, achieving **10,000 peak TPS** with sub-300ms P99 latency while enforcing strict financial consistency.
- **Observability & Incident Response:** Eliminated observability blind spots by resolving DB indexing validation mis-fetches. Maintained a **zero P0 incident track record** via SLO-driven alerting, achieving MTTA $<$**2 minutes** and MTTR $<$**15 minutes**.
- **Cross-Functional Execution:** Orchestrated zero-downtime payment migrations across Product, QA, and Ops by authoring **RFCs** and deploying **cohort-based feature flag rollouts**.

CoinDCX **Bangalore, India**
Software Development Engineer 1 (SDE 1) *June 2022 – Oct 2024*

- **CRM Security Gateway:** Engineered an OAuth 2.0/M2M authenticated gateway between Sprinklr and trading microservices, enforcing **zero-trust security**, strict PII masking, and data isolation.
- **Identity Lifecycle:** Automated KYC migrations and account recovery for **250,000+ user profiles**. Designed a **human-in-the-loop** exception gateway to safely automate high-risk state changes.
- **LLM Tooling & Guardrails:** Engineered secure retrieval APIs and a deterministic routing layer to ground customer chatbots. Implemented strict guardrail logic to prevent hallucinations and prompt injection across 10+ payment flows (**10,000+ monthly LLM queries**).

IntelleWings **Remote**
Data Science Engineer Intern *May 2021 – Nov 2021*

- Engineered a production-ready Named Entity Recognition (NER) pipeline achieving **92% F1-score** using spaCy/NLTK, deployed via REST APIs serving **10,000+ daily requests** at sub-150ms latency.
- Implemented distributed scraping pipelines processing **50,000+ daily documents** and optimized Elasticsearch indexing, cutting search latency by **50%** and boosting throughput by **3x**.

Technical Skills

Languages: Ruby (Ruby on Rails), Go, C++, TypeScript, JavaScript, Python, SQL

AI & LLM Tooling: Model Context Protocol (MCP), LLM Guardrails, Prompt Injection Prevention, Retrieval APIs (RAG concepts), Semantic Routing, NLP (spaCy/NLTK)

Distributed Systems: Apache Kafka, Redis, Microservices Architecture, Event-Driven Systems, Transactional Outbox, Idempotency Engines, State Machines, gRPC

Databases & Storage: PostgreSQL, MongoDB, Elasticsearch, Database Schema Design, Query Optimization, Connection Pooling

Cloud & Infrastructure: AWS (Lambda, SQS, EC2, S3), Docker, Kubernetes, Istio Service Mesh, CI/CD Pipelines

Observability & Tools: Datadog, Grafana, Prometheus, OpenTelemetry, JMeter, Git, Linux, Postman, SLO/SLA Management

Education

Indian Institute of Technology, Ropar **Punjab, India**
Bachelor of Technology (B.Tech) *August 2018 – May 2022*

Honors & Recognition

- **Whale of the Quarter & 2x Super Satoshi Awards (CoinDCX, 2024):** Recognized for technical leadership, high-impact architecture, and incident triage across payment reliability initiatives.
- **Deep Learning Specialization (HSE University, 2021):** Certified in foundational deep learning architectures and NLP sequence modeling.
